<b>Description</b>	Plantations of trees are important as they improve the life and fulfill essential needs of mankind. During photosynthesis, the trees breakdown food materials and consume carbon dioxide. Resultantly with the help of sunlight, the trees produce carbohydrates. All our teaching, non-teaching and students were actively participated in tree plantation event. We had planted trees such as mango, banana, coconut, ashoka, tamarind, curry leave plant, rose plant, chilly plant, fenugreek, mint, Neem tree, etc. & many were planted during this event. Due to this activity freshness developed in the surrounding atmosphere and encouraged the students to plant at least one each tree near their home or surrounding area. All program were successful with the support of our principal sir, staff and students.
